**First Name** - Andrea

**Last Name** - Surette

**Organization Name** - Student

**Comment** - I am a graduate student and work part time to earn an annual income of approximately \$8,000 per year. I am not eligible for Medicaid, nor am I eligible for any subsidies in the federal healthcare exchange. I am a healthy young person, but the current prices of plans are simply prohibitive and I will be unable to purchase any insurance at all. Please expand medicaid so that all Virginians, including healthy young childless people like me, can reap the benefits of having insurance. I believe that healthcare is a right for all, regardless of income.
