Virginia Medicaid Innovation and Reform Commission
VA

Dear Medicaid Innovation and Reform Commission,

Preventive health care is a fundamental right, and the Commonwealth should provide it for all Virginians, especially children, expectant mothers, the disabled, and the working poor. Medicaid expansion would create thousands of new, good-paying Virginia jobs, improve the lives of hundreds of thousands of Virginians, and cost Virginia taxpayers practically nothing. It's shameful that this hasn't already happened.

Sincerely,

Allen Muchnick
