Virginia Medicaid Innovation and Reform Commission
VA

Dear Medicaid Innovation and Reform Commission,

There is no justification for Virginia to pass up federal money to earmarked to ensure that lower income Virginians with or without children are able to obtain health care for themselves and their families with Medicaid. Without this much needed expansion of Medicaid, hundreds of thousands of Virginians are going to fall into the category of insufficient income for any health care subsidies. After completing the Health care .gov forms , I found myself in this category. I will be uninsured without an expansion. Don't leave these Virginia families out in the cold. Failing to allow these Virginians Medicaid will result in their increased use of emergency rooms and other expensive free forms of medical care which will result in raised premium costs for all of us. Do the right thing and take care of Virginians in the Commonwealth who voted you into office.

Sincerely,
Cheryl Evans

Virginia Medicaid Innovation and Reform Commission
VA

Dear Medicaid Innovation and Reform Commission,

There is no justification for Virginia to pass up federal money to ensure that poor and lower income Virginians are not able to obtain health care for themselves and their families. Without this expansion of Medicaid, hundreds of thousands of Virginians are going to fall into the hole of insufficient income for health care subsidies and too much income for existing Medicaid. Don't leave these Virginia families out in the cold. Failing to allow these Virginians Medicaid will result in their use of emergency rooms and other expensive free forms of medical care which raised the premium costs for all of us. Do the right thing and take care of Virginians without any cost to the Commonwealth or its citizens. Thanks you.

Sincerely,
Peter Leff
