**Comment** - I pay federal and state taxes and I have health insurance. My health insurance costs are partially driven by the cost of care for the uninsured that is not captured by any accounting program of which I am aware. By expanding Medicaid to those that cannot afford health insurance, cost containment would have a better chance as the cost of care could be captured and quantified. I think the cost of health insurance would drop more than any increase in my taxes. I fully support the expansion of Medicaid in Virginia.
