First Name - Chris

Last Name - Waller

Organization Name -

About file - No eloquent diatribe is necessary, as everything that needs to be said in opposition to ObamaCare has already been said, with the possible exceptions of the biased talking heads on NBC, CBS, ABC, CNN and MSCNBC. There's so little that is positive about the legislation and a mountain of detrimental aspects and features about this abomination of a law -- at the risk of being construed as a derogatory aspersion, it must be said that only an imbecile could consider this fiscal monstrosity good for our country and its citizens, for it is doubtless that an honest historical assessment of ObamaCare in 2020 will determine it to be the most catastrophically ill-conceived legislation in the history of the US and its economy, making the impacts of the S&L, banking and Great Recession pale in comparison. Enough said.
