**First Name** - Darrell**Last Name** - Harris**Organization Name** - Christian

**Comment** - If the government wants to provide health care to those who do not have it that is fine but I should not have to pay for it. I did not have health care until I was able to afford it and I rarely got sick until I got it. The government should only provide the opportunity for all of its citizens to get health insurance as soon as possible and keep the cost affordable for working Americans.
