**Comment** - The ACA is the first step towards the government being able to control the population and the course of human events in the direction they deem necessary. The narrative of for the common good or it's the fair thing to do is right out of the pages of the communist hand book. Except for the fact these people call them selves progressive. This ruse is to make people of little means think that by not putting forth any effort the government is going to give them what they need at no cost or sacrifice on their part. The sad realism will not come until later, when all the money is gone from the people working and none is left for them. Instead of the poor being brought up to the middle class the upper and middle class will be brought down to them. Only the elite and entitled will have wealth. This experiment has been tried many times all with the same result. History has taught us this lesson in the fall of the Roman Empire. A civilization so advanced it dwarfs the United States in contrast of ability for the time. If this law is allowed to stand, then there is nothing to stand in the way of the government reaching into your pocket and stealing your hard earned money for whatever purpose it deems necessary. The founding fathers lived this nightmare and came here to correct this form of government and put the power of governing in the hands of the governed. They understood human nature and provided a form of government that does not allow for the tyranny that has been visited on the American people. Stop this Form of communism from taking hold of the people of this
