**First Name** - Dwight

**Last Name** - Faught

**Organization Name** - Centrahealth

**Comment** - As a health care provider I am constantly confronted with individuals who can not access health care insurance and can not afford to pay for their care. I can not, in good conscious, not provide care to these individuals and yet I also can not afford to work for free. I feel strongly that all Virginians need to have the ability to access basic primary care and need to have access to the resouces which would make this possible. I am clearly in favor of the expansion. Thank you
