First Name - Elaine

Last Name - Levitt

Organization Name -

Comment - The Affordable Care Act is a great start to provide healthcare which should be provided to all Americans in the same way Medicare is provided to Senior Citizens. The Individual Mandate is a fair tax that helps hospitals who are forced to treat the uninsured-those who have made a choice not to get healthcare when clearly they can afford to. The public option which would have prevented the huge hikes in insurance was killed by the insurance companies now hiking everyone's insurance. Let's provide a public option and shame on Virginia for not giving people eligible for the new income limits on Medicaid the coverage they so desperately need. Where does this coldhearted behavior come from?
