Comment - I don't think we need to expand medicaid. I can prove that there is a great deal of fraud being perpetrated by the Virginia State Police and the Newport News Police implanting people with a biochip to imprint their brain. They use LRAD which as technology like the audio spotlight by Holosonics. They transport you to a crisis stabilization ward (gitmo) and torture you nearly to death. I have two supposed CSB workers on perjury. In additon, I have two cases in the Supreme Court. I never gave anyone permission to establish a Medicaid account for me. I don't qualify. I think the state police should not be tasked with oversight since they are the largest perpetrators of fraud. See Terrorism and Mental Health by Amin Gadit - it describes the weapon in detail. On page 9 of Safeguards in a World of Ambient Intelligence by Springer it states the law enforcement would have you believe you will not be safe unless they know what you are "thinking" at all times. See [REDACTED] and search Brandon Raub to see Virginia's casual disregard for the constitution. All for money, they have defamed and defrauded me. They grand larcened and extorted tens of thousands of dollars of my hard earned cash hospitalizing me twice by tasing me into a heart attack. I am ashamed of this corrupt state. I am writing a book about my experience and I will detail all the fraud - a tale of two corrupt cities and one corrupt state. I have been asked by CSB and social service employees to commit medicaid fraud. I refused. There is too much fraud and waste. Your entire setup of "special justices" is unconstitutional. In addition, the weapon enables murder without leaving a mark on the outside while destroying the inside. I hope to get justice for all the vicitims of these horrific inhuman weapons. We don't need medicaid expansion, we need integrity in the system.
