I know too many children that depend on FAMIS, poor people that depend on clinics, etc.. for you all to be sooo stubborn and not offer the Medicaid expansion via the healthcare bill known as Obamacare. Ohio's Governor did this too, now he's trying to backtrack, because it cost the Cleveland Clinic jobs. Jobs and healthcare to thousands, just because they rejected the Medicaid Expansion. How selfish, to make a political point to your ignorant bases, by hurting those that need care so bad. One of them is my grandson, who was diagnosed with cancer at 8 months old, was denied insurance because it was considered "pre-existing", (he wasn't a human while in the womb where they believe it started).

It is time for our country to have a Medicare for all system, and let the wealthy buy their cadillac plans, and the working poor get preventative care.
