**First Name** - sarah

**Last Name** - holland

**Organization Name** - NAMI

**Comment** - I think everyone is entitled to health care when they are MI or sick otherwise. It is almost impossible to see a Dr. or get help without some kind of insurance or lots of cash. There are too many people going without basic needs and medications. Medications keep mentally ill people level and productive well balance citizens. It is like a diabetic without insulin or a cancer victim without chemo or radiation. Please answer these basics needs and let someone live a normal life. Thank you Sarah Holland
