First Name - Tracy

Last Name - Hundley

Organization Name - none

About file - It is better to give adequate care to fewer people than to broaden coverage & do it badly. It gives people a false sense of security just to bolster a politician's bragging rights. A short term benefit - so do right by the people... serve the indigent as needed and dont create a larger pool of dependency. Fewer people help their families when they can pretend that government is doing it for them. false hope is inhumane & medicaid is already a disappointment
