First Name - Alan

Last Name - Clune

Organization Name -

Comment - The Medicaid expansion promises federal reimbursement only for the next 2 years. The expansion was part of the obama deal to fund obamacare. There is no guarantee that the federal government will continue the promised reimbursements (remember, the fed government has no money of its own; it spends our tax dollars) Medicaid expansion under the terms of this administration is foolish and dangerous. Why does VCC support it? Are your heads in the sand?
