First Name - Andrea

Last Name - Dawson

Organization Name -

Comment - I, as well as hundreds of people that I know, have felt for many years that more people should be able to qualify. Currently the income limit is about \$300 that is so unfair. ALSO, VA is one of 17 states that does not have Dental care for adults under medicaid. There is a epidemic with Americans having the worst dental care because no one can afford it. Only 2 percent of our population has good dental insurance. Im 36 and haven't seen a dentist in 20 yrs. Most ppl can't afford the insurance. Bad dental health will result in bad over all health ie: cancer and diabetes. Do the research.
