First Name - Andrew**Last Name** - Hamilton**Organization Name** -

Comment - No to Medicaid expansion. First, there is no way that it will create 30,000 new jobs. That's one job per every 13 new recipients - not believable. Plus, 60% have private insurance now - so you force them off of private insurance and into worse insurance, Medicaid. Now the insurance companies have less money, so people who work for them lose jobs. You're just switching \$\$ between pots - into a less productive pot too. Also, Paul Ryan says there is no way the Federal govt has the money to keep up the 90% payments, and may not be able to do the first 3 years. Virginia will be left holding the bag and we will have a fiscal crisis on our hands.
