First Name - Carol

Last Name - McElhinney

Organization Name -

About file - I urge you to make expansion of Medicaid possible in Virginia at this time. This constitutes a positive step toward a fairer and more coherent system of care for our state. I have had close relationships with a variety of people who, through no fault of their own, find themselves outside the current system. It is very difficult for them to piece together health care services. Moreover, expanding coverage will benefit providers by ensuring that they are able to provide care to more people with the assurance of recovering costs for the care. Virginians will overall be healthier. Thank you for your efforts to improve our health system.
