First Name - Claire

Last Name - Cifaloglio

Organization Name - Pediatrician, Retired

Comment - Evidence has shown that expanding Medicaid reduces mortality and improves access to care and health outcomes, and analysis has shown that As a pediatrician in Northern Virginia and as a volunteer at the Arlington Free Clinic, I had the opportunity to meet families who put off urgently needed health care until the effects were too serious to ignore. Don't we want to live in a Commonwealth in which we want ALL those that live here to enjoy good health. Medicaid expansion in Virginia will help to make that dream a reality and will, according to reliable studies, pay for itself. Thank you for your consideration.
