First Name - Dana**Last Name** - Mason**Organization Name** -

Comment - From a Christian Biblical perspective, nowhere is there a basis to fund healthcare on the backs of taxpayers period. Caesar is not to provide this service and any Christian who professes otherwise does not rely upon scripture as the whole instruction from God on life. To expand this wretched program is to only further apostate our God-given unalienable rights to property in violation of God's commandment not to steal and, ultimately, serves to solidify the cause of Socialism. To learn more on the limitations of civil government ordained by God, I'd recommend reading The Institutes of Biblical Law by RJ Rushdoony for any serious and committed Christian involved in making this very important decision. Stop robbing the taxpayer and obey God.
