First Name - Daniele

Last Name - Foster

Organization Name - individual resident

Comment - I am in support of Medicaid expansion. Think of the future when making this decision. Long term benefits greatly outweigh any initial cost or discomfort. Currently in Southwest Virginia we have Ram Clinics that come around twice a year, they are needed and helpful proven by how many people are treated by these free services, but this is not something to be relied upon. We deserve affordable, competitive WELLCARE. With the expansion of Medicare all Virginians will live a healthier more productive life, and isn't that everyone's bottom line? The employee would be in work more not out due to preventable sickness, which in turn they earn more to spend in their local economy; the employers get more production in turn growing their business; which frankly means more taxes to the state so it's a win win situation. Monetarily it makes good business sense and humanitarian wise it shows you truly care about the people who voted you in. It's a common sense decision don't over think it.
