Virginia Medicaid Expansion

Dear MIRC Member,

Medicaid expansion does nothing to address the underlying problems of quality medical care. Simply increasing the number of people covered by the same or an even smaller medical capability means less care for those already covered and no quality care for those who will fall under the new umbrella. And all this reduction in care will cost the average Virginian more money. So, please vote against this further government bloating and address the problem where it should reside - the free marketplace! Thank you very much.

Sincerely,

David Dietrich
