First Name - Debra**Last Name** - Baber**Organization Name** - Central VA Health Services, Inc

Comment - Please expand Medicaid in VA. We have many patients who are the working poor, that make too much for our slide, but not enough to buy their medications or even, sometimes, receive care. The disenfranchised good people of VA need to be able to receive health care and not have to make decisions about what they will forego. We have patients who work two jobs and still are not able to make ends meet. As low, uninsured wage earners they suffer the consequence of having to make these tough decisions. Expanding Medicaid might just give them the chance of getting the health insurance they need so they can get the health care they deserve.
