First Name - Don

Last Name - Assaid

Organization Name -

Comment - Please do not approve expanding Medicaid in the State of VA. Although the Federal Gov't. is promising to cover the costs the first 3 years, what happens after that or even before that, should they change their minds? Medicaid needs to be reformed not expanded. With many physicians refusing to even take Medicaid patients, any expansion would be worse than being uninsured as proven by the data that shows that uninsured patients are in better health and get better care than those on Medicaid. Please do not support this expansion of additional government largesse that will only grow in cost and complexity and ultimately bankrupt our Commonwealth.
