**First Name** - Donna

**Last Name** - Wood

**Organization Name** -

**Comment** - Excuse me but has there been a commission to study this and determine the most cost efficient, highly skilled way of providing health care to people who can't afford health care because they are disabled? We have commissions that we pay huge amounts of money to for everything else and if one hasn't studied this then that would be the first step and not forge ahead into an expensive, unsustainable system that may be fraudulently used. I am not for increasing medicaid in any way shape or form as I know people are abusing the system and more abuse of it is not a smart way to go. We are not a bottomless pit of money. We are struggling to survive with this mismanaged, corrupt government. Kindest regards, Donna
