**First Name** - Gail

**Last Name** - Theriault

**Organization Name** -

**Comment** - Citizens of Virginia with incomes below the poverty threshold are falling through the cracks with the Affordable Care Act. They qualify for no subsidies and do not have the income to pay the higher premiums. Medicaid must be expanded to include these individuals. I have a family member who has been unemployed for 6 years due to health conditions and does not qualify for subsidies or medicaid. He exists solely on charity from family members creating a hardship for all.
