Expand medicaid. Choose our well being over the "what if" money issues. We are not a "what if", we are here and we need health care and prevention that our president is trying to help Virginia give us. I am not some low life that is trying to manipulate the system. I worked a job, then had children, stayed home and raised them into college graduates. I am now an unemployed 58 year old woman that has been married 40 years, owns a small home, pays bills and taxes and we live on my husbands social security. Expand medicaid.
