I write as a citizen and as member of an academic as well as a religious community. Our biblical traditions witness to God's greatest concern and believers' most important responsibility as care for the poor. US citizens express their solidarity with fellow citizens most in need by making medical help available to them through the resources of the *Commonwealth*. That very name points to where we should go in terms of expanding Medicaid.

First Name Hans

Last Name Tiefel

Organization I write as private citizen.
