The 120 members of the Virginia Network of Private Providers, who employ more than 16,000 staff supporting more than 35,000 clients, support the expansion of Medicaid as a vital part of the implementation of the ACA. We feel strongly that it will not only be a positive move for Virginia, but we know that many of our direct care staff will benefit from having access to health insurance which is otherwise not affordable for them.

We also note that we are working with the staff of DMAS to plan for the reforms that will benefit both the system, our clients and allow our member agencies to provide clinically sound services with qualified staff.
