First Name - Jim

Last Name - Brown

Organization Name - Retired Professional Engineer

Comment - The original intent of the Obama Care Legislation was to make it possible for more Americans to obtain health insurance and not force a new government program down the throats of the average citizen. The writers should have developed legislation through a public participation process, not through a "we need to pass the bill" to see what is in it process. It is time to delay or cancel this program until a program that only meets the original intent is available.
