First Name - joe

Last Name - schooff

Organization Name -

Comment - We don't need this. Most of these "uninsured" choose not to be. I don't see dead littering streets due to no insurance. They get taken care of if needed. This will destroy the best health care in the world because the politicians want to control everyone's life. It is not about health care. It's always been about control. The Catholic church supports these lies and then complains they have to allow abortions. Make a deal with the devil, you pay.
