Comment - Every day we delay expanding Medicaid, Virginia loses \$5 million in federal funds, \$110,000 in state revenues, and \$370,000 in lost savings. Virginians are already paying for Medicaid expansion through their federal taxes. Why should we pay for other states to expand Medicaid while leaving hundreds of thousands of Virginians uninsured? Medicaid expansion would pay for itself over the next nine years. It's a smart investment that saves dollars and is good for Virginia's bottom line.
