First Name - Kurt

Last Name - Herbel

Organization Name -

About file - Expanding Virginia's already broken Medicaid system is not wise. Obamacare will only make things worse for participants and taxpayers. 1 of 4 doctors do not accept patients with Medicaid and this number is expected to grow rapidly. Also Medicaid patients are 2X more likely to die than others. This says a lot about the lack of good care available to those on the program. There are better ways to fix the medical system. I urge you to please look into these other ways.
