**First Name** - Margaret

**Last Name** - Sewell

**Organization Name** - citizen

**Comment** - I strongly urge the Commission to recommend expansion of Medicaid in Virginia. I can see no drawbacks that would outweigh the incalculable benefit to low income working Virginians who currently either forgo needed medical care, or risk bankruptcy to obtain treatment for medical disasters such as cancer treatment or catastrophic accidents. We are all already paying the cost of emergency room treatment for uninsured patients in indirect ways, and it makes no sense to leave federal dollars to which we are entitled on the table. Thank you.
