First Name - Mark

Last Name - Stepongzi

Organization Name -

Comment - The Virginia Medicaid coverage should not be expanded at this time. The US Healthcare System is broken and expanding a broken system will not help those needing healthcare. First issue is that the number of doctors has not increased so the quality of healthcare will decline r everyone. Last issue is that once the federal financial assistance (only for the first two years) for the Medicaid expansion is over, then the Commonwealth budget will have to fund the expansion. By voting for this bill, the MIRC is voting for a MASSIVE TAX INCREASE that will come due in two to three years!
