First Name - Mary**Last Name** - Boyd**Organization Name** - Mrs.

Comment - The most vulnerable, i. e. the children, the working poor cannot be penalized and not provided with adequate health care. Medicaid must be expanded to serve the most needy. For the 1st 3 years, the Federal Govt will pay 100% of these costs and then 90% will be covered with the State only responsible for 10% of the costs. Universal health care is not extraordinary in the world. The USA is one of the few industrialized and wealthy nations that do not provide it.
