First Name - Philip

Last Name - Hamilton

Organization Name - Heritage Action for America

Comment - I have been to the two past Medicaid expansion meetings to observe arguments from both sides. I understand while individuals want increased healthcare coverage for the poor to help raise the quality of life, but healthcare coverage through the government will lead to unnecessary government intervention into individual lives. Also, we cannot afford healthcare expansion since it will lead to tax hikes in the state of Virginia. We need to have private organizations in charge of caring for the poor. It has been that way since most of this nation's history and over the past few decades the government has been overstepping its bounds and has created a permanent welfare class of people dependent on the government. We need people to be INDEPENDENT rather than DEPENDENT, vote NO for Medicaid expansion!
