Comment - I fully support the Medicaid expansion. First, I believe every American has the "right" to health care. The most economical way for those who cannot afford to pay current high prices is via Medicaid--less expensive than through the exchange or by private means. Second, it is the most efficient way to do it. Certainly, health care via using hospital emergency rooms is costly and inefficient--and I pay for it by higher premium on my policy. Not to accept 100% of cost from federal government is hard to comprehend. Maryland will leave Virginia in a bad place in comparison.
