**First Name** - Stephanie

**Last Name** - Arje

**Organization Name** -

**Comment** - I spent 4 hours on the telephone looking for a place both that carried my item and accepted my insurance when trying to purchase medical supplies. In the process I learned that medical suppliers were not carrying certain items (including mine) because of Obamacare insurance related changes. The changes made it impossible for the supplier to break even on his costs after insurance and the mandated patient copay. If this is the way it is now, what will it be like if we expand services to include a larger pool of people? Please do not implement this program which will become an unfunded mandate. It is fiscally-disastrous, will eventually require higher taxes, will further expand government control of healthcare, increase dependency, and diminish quality of care. Thank you.
