**First Name** - Tim

**Last Name** - Smith

**Organization Name** -

**About file** - Do not expand Medicaid in Virginia. The system is broken and the new health care law will only worsen things for the state. This is the wrong direction to proceed, Medicaid expansion means that the folks who need the most help would get hurt the worst and cost the tax payer of Virginia billions of dollars. Nearly one in four Virginia doctors don't accept new Medicaid patients. Medicaid expansion means longer wait times and destruction of the doctor-patient relationship, this is bad for Virginia.
