**Comment** - I am upset that Virginia's current Governor and General Assembly elected to opt out of the Medicaid expansion available under the ACA and thereby chose not to take the federal funds available to help Virginia provide medical care to Virginians who are uninsured or under-insured. As a result, Virginians will pay federal taxes that will go to help people in other states rather than our friends and neighbors here in Virginia. I think this is both morally wrong and fiscally irresponsible. I support Medicaid expansion in Virginia.
